

GravityZone

GravityZone Business Security is a bundle of security services designed for small and medium businesses, combining #1-ranked security with the simple centralized management of workstations and servers.

UNFOLLOW THE TRADITIONAL GravityZone Business Security is a powerfully simple security solution to protect your business. Unlike other solutions, GravityZone does not trade performance for protection and does not slow down your users' computers.

KEY FEATURES

It's easy to install and easy to manage

- Automatically uninstall legacy solutions.
- Console is available immediately after signup.
- Automatically discover network computers using Windows Network Discovery.
- Start faster with provided security policy templates.
- Granular policy settings are available for advanced admins, but those without an IT background will also find the solution simple to manage.
- Implement a powerful but simple solution and eliminate the need for dedicated servers, maintenance or more IT staff.

Cut Costs Web-based security eliminates the need for hardware.

- Reduce costs and centralize security for any number of users to a single console.
- With centralized management, employees never have to update, monitor or troubleshoot security again, and can focus 100% on the business.
- Bitdefender consistently ranks first in independent tests so you can relax knowing you have the best protection.
- Our solution protects computers against viruses, rootkits, malware, phishing, data loss, web threats and much more.

Relax Forget about security issues.

- Advanced heuristics, web filtering, search advisor, USB scanning to block all malware entry point are included.
- The updates are automatic and users can't interfere with settings or deactivate protection so your business is protected.
- Apply policies based on location or user and allow different levels of freedom, save time when creating new policies by using ones that are already created.

GravityZone Business Security has consistently ranked the #1 security software in tests by independent reviewers such as AV-TEST and AV Comparatives and it does not compromise protection for performance.
